

Introducing **New Mini SATA3 6G Solution (MSATA3-XX)**

Features:

- **Shortest:** Low-profile design with an industry leading **shortest connector 12mm** as the name of **"Mini SATA3"** implies is indeed incorporated to support more aggressive mechanical design.
- **Thinnest:** Our **Halogen Free** UL21425 28 AWG **"Mini SATA3"** cable has a **1.27mm thickness** comparing to the 2.20mm thickness of the 26 AWG SATA cable in the market.
- **Slimmest:** Our **6.5mm slim width** conserves space and maximizes airflow.
- **Lightest:** **Weight of 14.3g/meter** lightens the heavy burden on elegant cable management.
- **Flexibility:** Material allows the cable to be folded with a **radius bend less than 5mm**.
- **Performance:** Achieving the **signaling rate of 6 Gbps** for SATA3 specification and industry standard.
- **Zero Loss:** The **insertion loss** is down to **zero** and no flimsiness

Performance Test Data for SATA3-6G-XX Series is shown as below
